

## 1700326 - PL - Wrong data in inventory aging report

Component: SBO-REP-MM (Inventory Reports), Version: 2, Released On: 07.10.2014

### Symptom

You are generating an inventory aging report with the issue strategy as *FIFO* and valuation as *Document Price* for a FIFO item. The item is linked to a goods receipt in two different lines: the first line has a price for the FIFO item and the second line does not have a price for the same FIFO item. When you run the report, it displays incorrect data and calculates an incorrect value for the FIFO item.

### Reproducing the issue

#### Scenario:

1. Create a new item managed by FIFO.
2. Add a goods receipt with 2 lines for the same FIFO item:
  - First line: quantity 1, price 100
  - Second line: quantity 1, price 0
3. Run the inventory aging report with the *FIFO* issue strategy and *Document Price* valuation.

#### Expected Result:

The cumulative quantity is 2 and the cumulative value is 100.

#### Actual Result:

The cumulative quantity is 2 and the cumulative value is 200.

### Cause

Future Version Candidate (FVC)

### Solution

Correction of system behavior is not feasible in the currently supported versions of SAP Business One. The error has been recorded and is a candidate to be fixed in a future version.

### Other terms

SAP Business One, LIFO, FIFO, inventory, valuation method, item master data, inventory receipt, stock receipt, localisation Poland, Polish localization, unit price, price after discount, empty, system behaviour, stock ageing report, aging
